20 Points

30 Points

40 Points

50 Points

Objective

Increased availability of sustainable and affordable housing in your community.

A **webinar** regarding this action is available for viewing. [Check out past Webinars.](#)

What to Do

The more you do, the more points you earn.

1. Identify the current percentage of affordable housing in your community. Municipalities with at least 10%, the threshold above which developers cannot use the Affordable Housing Appeals procedure, will receive points. **Note:** "Affordable" housing costs 30% or less than 80% of median income in the state (or 80% of area median income, if that figure is lower than the state's median income). This definition of "affordable" is consistent with that used in Section 8-30(g) of the Connecticut General Statutes. **(10 points)**

Submit: A copy of the most recent annual Connecticut Department of Housing Affordable Housing Appeals List, showing that 10% or more of your municipality's housing stock is affordable. Alternatively, please simply note in your submission that your municipality is on the most recent annual Affordable Housing Appeals list. If your municipality is creating housing affordable to residents earning less than 80% of the lower of state or median income, please note the income level in your submission.

2. Increase your municipality's affordable housing, as compared to a baseline year within the past 5 years. Establish or identify a baseline year of data for the percent of your municipality's housing stock that is affordable. Using the percentage listed on the most recent Connecticut Department of Housing Affordable Housing Appeals List at the time of submission, calculate the percent change of housing from the established baseline. For each $\frac{1}{4}$ percentage point increase or increase of 50 affordable units, 10 points will be awarded, up to a maximum of 40 points. **(10-40 points)**

Submit: A copy of the most recent annual Connecticut Department of Housing Affordable Housing Appeals List, as well as the list for the baseline year to which you are comparing. Alternatively, please submit the affordable housing percentages for the current year and the baseline year, as reflected on the Department of Housing Affordable Housing Appeals lists for the relevant years.

Ideally, your municipality will promote sustainable construction practices in affordable housing development and development in general by encouraging integrative design, consideration of location and neighborhood fabric, site improvements, water conservation, energy efficiency, building materials, healthy living environment, operations, maintenance and resident engagement. In future certification cycles, points may be awarded for sustainable construction.

Potential Municipal and Community Collaborators

Planners, planning and zoning commissions, and social services departments within your municipality may collaborate with affordable housing developers, property owners, affordable housing advocates, housing finance agencies, public housing authorities, and community and regional residents and other stakeholders to implement this action.

Funding

Below are potential funding sources specific to this Action. For a complete listing of potential funding opportunities to assist with implementing Sustainable CT Actions, please visit the [Sustainable CT Grants Portal](#), which is searchable by Action. Please also visit the [Sustainable CT Resources for Certification](#) page for opportunities for technical assistance and other supports.

Why This Matters

Municipal and statewide economic challenges, changing demographics, challenges in affordability, and preferences for more walkable neighborhoods that offer high quality of life all suggest that Connecticut communities need to adapt their housing stock to emerging needs. For example, the vast majority of occupied homes in Connecticut are single-family, but demand is increasing for other housing types. The majority of our state's housing is more than 50 years old. Increasing need for energy efficient housing that utilizes more renewable energy and incorporates universal design and other features will demand retrofits and new construction.

Benefits

By expanding the availability of affordable housing in your community and using sustainable construction practices, you reduce the potential adverse environmental impacts of development. This action also improves the physical, emotional and fiscal wellbeing of your residents, builds community, and increases equity in the community. Greater availability of affordable housing also increases the available property tax base and hence results in greater municipal economic well-being.

Credit for Past Action

- Municipality must be above the 10% affordable housing threshold within 1 year prior to application submission.
- For demonstrating increases in affordable housing over time, the baseline year must be within 5 years prior to application submission.
