

## 7.8 Develop a Food Waste Prevention and Food Scraps Recovery Campaign

5 Points

10 Points

15 Points

### Action Updates

This action has been revised for the **2019 certification cycle**. A version of this action from the prior program year is [available for comparison](#). Edits are highlighted in yellow.

### Objective

Reduce or eliminate food waste.

### What to Do

*If you collaborate with one or more neighboring municipalities, each municipality will earn points.*

1. Choose one or more target sectors and implement or maintain an ongoing food waste prevention campaign in those sectors. Consider any measurable impacts observed as a result of the program. Examples of campaigns eligible for points under this Action are listed below. **(5 points)**
  - An educational campaign to raise awareness of strategies to prevent food waste in schools, including the support of sharing tables and the purchase of mini-refrigerators for unused food items.
  - A campaign to prevent residential food waste. Strategies include educating residents on effective menu planning and shopping and the difference between “sell-by,” “use-by,” “best-by,” and expiration dates.

**Submit:** A brief overview of outreach (suggested 5 sentences maximum), including target populations (if any); at least one example from among materials disseminated, which could include flyers, articles, letters, newsletter, powerpoint presentations, or pdfs of other digital communications materials. Include a list of any campaign-sponsored events or public meetings where the campaign was highlighted and discussed.

2. Choose one or more target sectors in which to implement a food scraps recovery program. Partner with your municipal or district health department in implementation to balance food scrap recovery goals with public health concerns. Examples of programs eligible for points under this Action are listed below. **(10 points)**
  - Organize home composting workshops and distribute compost bins to residents.
  - Implement a curbside composting pilot, establish a curbside composting program, or implement a pilot or full program to collect food scraps for anaerobic digestion.
  - Support one or more schools in your community in the implementation of a food scraps recovery program.

**Submit:** An overview of your community’s food scraps recovery program, including target populations (if any); the date of your municipality’s most recent meeting with its municipal or district health department regarding implementation of your food scraps recovery program; and at least one additional piece of document, which could include flyers, articles, letters, newsletter, powerpoint presentations, or pdfs of press coverage or digital communications materials.

## Credit for Past Action

- Each campaign must have been initiated or actively continued within 1 year prior to application submission.

## Potential Municipal and Community Collaborators

The municipal recycling coordinator, public works department director, or other appropriate municipal staff involved in materials management should be involved in the implementation of this Action. Community partners include representatives from the target sectors involved.

## Funding

For a complete listing of potential funding opportunities to assist with implementing Sustainable CT Actions, please visit the [Sustainable CT Grants Portal](#), which is searchable by Action. Please also visit the [Sustainable CT Resources for Certification](#) page for opportunities for technical assistance and other supports.

## Why This Matters

The primary component of solid waste in Connecticut is organic waste, most of which is discarded food. Through composting, food waste can become a precious agricultural resource (organic fertilizer). When food waste goes into landfills, it does not decompose, but rather off-gases methane. Not only does the off-gassing contribute to climate change, but also that earth-friendly fertilizer resource is lost.

## Benefits

When you reduce the food waste in your community, you also lower the adverse environmental impacts on your air and water supply, reduce your greenhouse gas emissions, and decrease your solid municipal waste. As a result, both the sector targeted by your campaign and your municipality will save money through less over-purchasing and reduced disposal costs. Thoughtful and strategic donations of uneaten food can also ensure that low-income residents in your community have something to eat, helping build community and promote equity.
