

1.2 Implement Sustainable Purchasing

5 – 45 Points

Action Updates

This action has been revised for the **current certification cycle**. A version of this action from the prior program year is [available for comparison](#). Edits are highlighted in yellow. (Last update 2020)

Objective

Commit to purchasing sustainable goods and services.

Note: When determining if goods and services are sustainable, the following sample environmental attributes can be considered: Biobased, Biodegradable, Bisphenol-free, carcinogen-free, Chlorofluorocarbon (CFC)-free, Compostable, durable, energy efficient, flame retardant-free (especially halogenated flame retardants), free of antimicrobial chemicals, heavy metal free (e.g. no lead, mercury, cadmium), less hazardous, low Volatile Organic Compounds (VOC) content, low-toxicity, made from renewable materials, Per and Poly Fluoroalkyl-free, phthalate-free, reduced packaging, refurbished, reusable, Water efficient.

Complementary action:

- [Provide Resources and Support to Local Businesses](#)

What to Do

If you collaborate with other municipalities or other stakeholders to implement this Action, please describe the partnership in the “partners” box of your submission. Please also consult this [guidance document](#) to help your municipality earn points for actions pursued in partnership. Regional collaboration and other forms of partnership are highly encouraged.

The more you do, the more points you earn.

1. Have municipal elected official and/or staff members and/or commission members participate in a sustainable procurement training. Any training pursued here may not also count for points under Sustainable CT Action 7.3 **(5 points)**

Submit: The names and contact information of the individuals who attended the training; and the name of the training, the date it occurred, and the organization that provided the training.

2. By municipal resolution or ordinance, adopt a sustainable purchasing policy, distribute the newly adopted policy to relevant department or division heads, publish the policy to the municipal website, and communicate the policy to relevant suppliers and vendors. At a minimum, the policy should address at least two social impact areas and four additional environmental impact areas **(20 points)**:

Social Impact Areas

- o Promotion of purchasing cooperatives,
- o Engagement with locally-owned businesses, sustainable, or eco-friendly businesses, minority and women-owned businesses, and alternative corporate structures, such as [B Corps](#) and cooperatively owned businesses. A definition of “[local](#)” should be stated for purposes of the policy.

- Purchase goods and services that are certified “fair trade” or are otherwise ethically sourced and free from forced labor and/or child labor.

Environmental Impact Areas

- Recycled-content, reused and/or refurbished products
- Less harmful and/or non-toxic materials and processes,
- Energy and water-efficient products and processes,
- Natural resource and landscaping including implementing a green grounds and management, maintenance program,
- Renewable energy products, such as solar, wind and/or hydropower,
- Disposal and pollution reduction,
- Sustainable, “green” or Leadership in Environmental and Energy Design (LEED) certified building construction design and/or materials, and
- Other topics consistent with the objective of this Action that your municipality deems appropriate.

Sustainable purchasing policies may include any other topics your municipality deems appropriate. Your municipality may establish a formal policy or submit documentation to prove that your municipality utilizes WaterSense labeled products under. You may still include management of municipal water use in your sustainable purchasing policy, but you may not count managing municipal water use as one of the four or more environmental impact areas you highlight in your sustainable purchasing policy under this Action 1.2. Similarly, there is no double-counting with other Sustainable CT Actions that overlap with sustainable purchasing policy areas.

Submit: The sustainable purchasing policy that the governing body adopted by resolution or ordinance, as well as evidence that you distributed the adopted policy to relevant municipal departments (either via email, an in-person meeting, a staff newsletter or other channels). Please also describe specifically where your policy addresses each of the areas listed above.

3. Implement your municipality’s sustainable purchasing policy. (10 points)

Submit: An estimate of the percentage of your municipal budget used to purchase sustainable goods and services and a brief narrative description of which goods and services are sustainably purchased by your municipality and which social and environmental impact areas in your sustainable purchasing policy are impacted.

4. Develop and maintain an up-to-date vendor list to use for requests for quotations, small purchases where no quotes are required, requests for proposals, and other purchasing opportunities. Your list must incorporate special designations, which may include those for locally-owned businesses, sustainable, or eco-friendly businesses, minority and women-owned businesses, and alternative corporate structures, such as [B Corps](#) and cooperatively owned businesses. You may choose to collaborate with representatives from other communities to develop a regional vendor list. (10 points)

Submit: The vendor list, including an explanation of the special designations incorporated into the list. For regional vendor lists, each participating municipality will receive points.

Credit for Past Action

For spring certification, count back from February 1st of the current year. For fall certification, count back from August 1st of the current year. For further clarification on determining if your prior work is eligible to earn points, [click here](#).

- The training must have occurred within the past 3 years.
- The sustainable purchasing policy must have been adopted or updated within the past 5 years.
- Vendor lists must have been created or updated within the past year.

Potential Municipal and Community Collaborators

Municipal collaborators include staff from purchasing, operations, administration, building, maintenance and economic development. As you implement this Action, also include business associations, chambers of commerce and other business alliances, individual businesses and community groups.

Funding

For a complete listing of potential funding opportunities to assist with implementing Sustainable CT Actions, please visit the [Sustainable CT Grants Portal](#), which is searchable by Action. Please also visit the [Sustainable CT Resources for Certification](#) page for opportunities for technical assistance and other supports.

Benefits

Committing to sustainable purchasing will lessen adverse environmental impacts by reducing waste generally and hazardous materials specifically. It can also lessen transportation, resulting in lower costs and greenhouse gas emissions.
