

Adapt Permitting Process to Promote Sustainable Development

Beginning in 2021, Sustainable CT has adopted a new numbering system for its actions. To translate between the new and prior numbering schemes, please visit our website to view a numbering translation guide.

Action Updates

This action has been revised for the **current certification cycle**. A version of this action from the prior program year is [available for comparison](#). Edits are highlighted in yellow. (Last updated 2020)

Objective

Promote and incentivize sustainable development by creating an efficient and user-friendly land use permitting process.

Complementary Action:

- **Integrate Sustainability into Plan of Conservation and Development**

What to Do

The more you do, the more points you earn.

1. Develop sustainability checklists for zoning and building applicants that identify sustainable site plan design elements. Examples are available in the "Sustainability Concepts in Action" sheet. **(5 points)**

Submit: Copies of your sustainability checklists.

Timeframe for Credit: Eligible for new action credit and rolling credit. This action falls under the action type "Websites, Maps, Inventories, Checklists, Assessments, Plans, Ordinances, Policies, Regulations and Resolutions" (see "Timeframe for Credit" Guidance Document for submission requirements).

2. Identify applications where expedited permitting is viable and amend zoning regulations to provide an as-of-right (Site Plan) approval process for projects that meet sustainable design standards as established in the regulations (for example, SolSmart). Consider including projects located in distressed/under-developed/vulnerable areas. **(5 points)**

Submit: A copy of amended zoning regulations, noting where revisions were made to allow as-of-right uses that meet sustainable design standards.

Timeframe for Credit: Eligible for new action credit and rolling credit. This action falls under the action type "Websites, Maps, Inventories, Checklists, Assessments, Plans, Ordinances, Policies, Regulations and Resolutions" (see "Timeframe for Credit" Guidance Document for submission requirements).

3. Establish or amend your municipal policy for pre-application review. Adopt a written policy that recommends review of projects prior to submission of formal plans and applications. The policy should incorporate a coordinated review by all relevant departments, a coordinated review schedule for approval by all relevant departments, and clearly reference the checklist and standards developed above for sustainable plan review. **(5 points)**

Submit: A copy of the written policy describing the pre-application review process.

Timeframe for Credit: Eligible for new action credit and rolling credit. This action falls under the action type "Websites, Maps, Inventories, Checklists, Assessments, Plans, Ordinances, Policies, Regulations and Resolutions" (see "Timeframe for Credit" Guidance Document for submission requirements).

4. Review town processes for permitting and create a Development Review Manual that includes a description of the pre-application process established. A Development Review Manual is a step-by-step guide to navigating your municipal land use process from start to finish. **(5 points)**

Submit: A copy of your Development Review Manual.

Timeframe for Credit: Eligible for new action credit and rolling credit. This action falls under the action type "Websites, Maps, Inventories, Checklists, Assessments, Plans, Ordinances, Policies, Regulations and Resolutions" (see "Timeframe for Credit" Guidance Document for submission requirements).

Timeframe for Credit

Actions can either be "New" or considered for "Rolling Credit."

New Action Credit. Any action completed within the past three years (from January 1 of the year seeking certification) is eligible for potential certification points. If you are applying for recertification in your year of expiration, you may not claim *New Action Credit* for items that previously received credit.

Rolling Credit. For any action older than three years (from January 1 of the year seeking certification), you must demonstrate ongoing, currently relevant, and meaningful impact in your community to be considered for certification points. If you are applying for recertification in your year of expiration, you must apply for *Rolling Credit* for any item that previously received credit, even if it was completed within the past three years.

View the "Timeframe for Credit" Guidance Document for detailed submission requirements.

Engaging Partners

Sustainable CT encourages regional collaboration and other forms of partnership. For every action, please complete the "partners" box in your submission, indicating the name(s) of any municipalities and/or organizations you partnered with (if any) and a brief description of your municipality's role. For additional information, please see the Partners Guidance Document.

Potential Municipal and Community Collaborators

Staff from the planning and zoning, engineering, building, and fire departments and a representative from the planning and zoning, inland wetlands, conservation, or energy commission could be helpful in implementing this action.

Benefits

By reducing permitting hurdles and administrative costs and providing incentives to developers to incorporate sustainable elements early in a proposed project's design stage, your community can encourage and support sustainable development practices. The guide will have a dual benefit of reducing time and costs to town and applicants for projects.

For a complete list of funding opportunities, implementation resources, and success stories specific to this action, please visit the full Action write-up on the [Sustainable CT Actions webpage](#).
